

# Enshrine 欣奉 — Website Admin Guide

How to log in and manage the website at [enshrinepet.com.sg](https://enshrinepet.com.sg)

## Login details

|             |                                                      |
|-------------|------------------------------------------------------|
| Web address | <b><code>https://enshrinepet.com.sg/admin</code></b> |
| Username    | <b><code>admin</code></b>                            |
| Password    | <b><code>P@55w0rd</code></b>                         |

**Please change this password after your first login** (see step 4). The admin page is public on the internet, so use a strong passphrase, e.g. `BlueDahlia-Geylang-2026!`

## 1. Log in

1. Open **`https://enshrinepet.com.sg/admin`** in your browser.
2. Enter the **username** and **password** above, then click **Log in**.
3. You'll see a top menu: [Edit Content](#) [Users](#) [View Site](#) [Log out](#) . (Sessions last 8 hours.)

## 2. Edit text & photos

1. Click **Edit Content**. The page is divided into the same **sections** as the website (Hero, About, Services, Columbarium, Niches, Contact, Footer).
2. Change any text field, then click **Save** for that section — the change goes **live immediately**.
3. To replace a photo, use the image field in that section (JPG/PNG, up to 8 MB) and Save. A fast web-optimised version is created automatically.

## 3. Edit other languages

- The site has **6 languages**: English, 中文, Bahasa Melayu, தமிழ், ไทย, Tiếng Việt.
- Use the **language selector** on the Edit Content page to choose which language you're editing.
- **English is the master**. Anything left blank in another language automatically shows the English text.
- Phone, email, address, links and images are **shared** across all languages — set them once (in English).

## 4. Manage logins (add admin / change password)

Click **Users** in the top menu:

- **Add a new admin**: under *Add a new user*, enter a username + password → **Add user**. Every user is a full admin.
- **Change a password** (including your own): type a new password on the user's row → **Update**.
- **Remove a user**: click **Delete**. You can't delete the account you're using or the last remaining admin.

## 5. Good to know

- Changes publish **instantly** — there is no separate "publish" step.

- Your edits are **kept safe** when the website's software is updated.
- **View Site** opens the live website; **Log out** ends your session.
- Forgot the password? Another admin can reset it on the Users page; otherwise your developer can reset it.
